

MAC VU360™
A virtually Unlimited ECG Experience

Smart. Integrated. Secure.

Inspired by you

Innovation with a 360° view of your world

We spent hundreds of hours with clinicians and IT professionals to identify today's biggest ECG challenges. From inconsistent quality to repeat ECGs, multiple new users to poor integration with hospital systems, inferior ergonomics to increased security threats, we heard it all.

And we listened.

Infinitely smart, integrated and secure

MAC VU360

Our fastest, highest-quality ECG ever — thanks to **Smart Acquisition**

One workstation — featuring **seamless integration** — for *all* of your ECG work

Inherent ECG-system **security**

Our fastest, highest-quality ECG ever
— thanks to Smart Acquisition

Because you demand quality and speed

Smart Acquisition lets you stay in control

With more and more people sharing responsibility for performing ECGs, maintaining quality and efficiency across all departments and care areas can be difficult. MAC VU360 **Smart Acquisition** is a combination of four features created to deliver optimal ECG quality and speed, even in the most challenging situations.

REDUCE REPEATS:
Smart Auto-ECG algorithm
immediately captures and displays
the first clean, high-quality ECG.

MINIMIZE MIX-UPS:
Smart Lead technology
automatically detects a newly
connected patient.

AVOID VARIABILITY:
Enhanced Hookup Advisor™
guides even the newest user to a
clean, high-quality waveform.

OPTIMIZE QUALITY:
Lead reversal detection helps users
to place electrodes correctly.

Smart tools, smart decisions

Speeding effective cardiac care

Physicians must have accurate, detailed information to deliver critical diagnoses with speed and confidence. With that in mind, in addition to **Smart Acquisition**, MAC VU360 features the full suite of GE HealthCare's ECG analysis programs.

- **Marquette™ 12SL** provides proven accuracy and quality that meet industry standards and guidelines.
- Whether you're taking a 12-lead or rhythm ECG, your ST segment will be consistently accurate thanks to the **Zero Phase Distortion (ZPD)**.
- Make pacemaker annotation in real-time! **The high-definition pacemaker** detection also identifies artificial pacing not visible on ECG waveform, allowing physicians to see artificial paced beats or conduction abnormalities.
- Don't miss a beat with the **Full Disclosure module** which lets you quickly select any 10 seconds in memory.
- Accelerate reading and review with condensed **Full Disclosure rhythm report** capable of reducing 30 pages to three, which can be digitally sent to MUSE™.

Your perfect fit

Smart design means form follows function

You said an ECG workstation should be easily adjusted, easy to clean, and easy to maneuver — and that's exactly what we delivered.

■ MAC VU360 unique cardiac acquisition module with **built in bar code reader** simplifies ECG acquisitions.

■ The ergonomic, **height-adjustable trolley** and tiltable display fit people of all heights, so user experience is improved and workplace injuries may be reduced.

■ Smooth, **easy-to-clean** flat surfaces and **enclosed storage** reduce the risk of cross-contamination.

■ MAC VU360 is, on average, **12% smaller and lighter** than select other premium ECG systems*, offering superb maneuverability and an easy fit in crowded spaces.

**Comparison available upon request*

One workstation for
a complete ECG workflow

- Display and print the first prior ECG from the MUSE server for the current patient
- The MAC VU360 ECG workstation can act as a portal to your MUSE to access the patient's complete ECG history.

More flow in your workflow

Improved access via the web with MUSE NX

MAC VU360 adjusts to your workflow, saving you time and providing access to powerful patient data, when and where you need.

Quickly access only the orders you need, with easy filtering and search functionality that's always at your fingertips.

Make faster, more informed cardiac-care decisions by comparing current and previous ECGs right at the bedside, immediately routing ECGs for overread, or reviewing prior clinical studies stored in the MUSE NX system, via remote apps.

Work smoothly across different platforms, with support for DICOM® ECG workflows that connect to a wide variety of third-party CVIS, EMR/EHR and ECG-management systems.

Inherent ECG-system security

Secure your way

Because we put a premium on your peace of mind

Naturally, with today's hyperconnected data environment, you worry about patient privacy and data protection. Simply stated, MAC VU360 is built on the most secure resting ECG platform we have ever designed.

E-Deliverable security software updates are included with every MAC VU360 purchase, allowing you to maintain total control over the update process.

Patient data **encryption**, username/password **authentication**, and secure network connections support data integrity.

A strong central security team is **constantly developing** additional security patches to address vulnerabilities as needed.

Easy Serviceability

To keep your device operating at peak performance

Minimizing disruption of patient care while maintaining and troubleshooting medical devices is a constant challenge. MAC VU360 takes a proactive approach, integrating key features that make service easy — while maximizing availability, utilization, and reliability.

On-board diagnostic tests for 16 different parts, with ability to display results on-screen, print, or save to USB.

To minimize downtime, MAC VU360 is designed for quick and easy access to critical parts needing repair or replacement.

To protect your investment, we offer a variety of affordable service solutions.

Protect your investment

A well trained staff can help you achieve your organizational goals

GE HealthCare offers a variety of training and education programs to help you maximize your investment and help you gain the knowledge and skills to simplify your workflow and improve patient care.
